Juice of Lemons! How to Make Skin White and Beautiful

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of cold cream. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as sallowness, freckles and tan and is the ideal skin softener, smoothener and beautifier.

Just try it! Get three ounces of orange white at any pharmacy and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It naturally should help to soften, freshen, bleach and bring out the roses and beauty of any skin. It is wonderful to smoothen rough, red hands.—Adv.

The law firm of Batchelder & Thompson has offered the firm's front office in the bank building as headquarters. Miss Cushing goes May 2 to Burlington to take a 10 days' course in surgical dressings and on her return will give instructions to persons caring to receive them.

Owing to a leak in the engine of the Stanley steamer car due to leave this station at 5:30 last evening over the White River railroad, an engine had to be sent for from Rochester, which made the train 90 minutes late at the start.

A special meeting of the Whitcomb high school district is called for Monday evening, April 23, at 7 o'clock, agreeable to the petition of a large number of taxpayers, to see if the district will vote to buy from James F. Ripley the south half of the tract known as the fair ground, which he bought lately from E. D. Gilson. The need of a playground for the 300 pupils of the village school and the fact that by a private enterprise \$1,000 has been raised to put the grounds in condition for a baseball field, are urged as reasons for the purchase. The field is the only possible playground accessible to the students during school recesses or noon periods.

The semi-annual convention of the White River District Sunday School association will be held at the Congregational church Tuesday, April 24, forenoon and afternoon. The speakers will include Rev. Charles A. Boyd of Burlington, Rev. Dr. A. H. Morrill of Woodstock and Miss Mary Warren of Pomfret.

Morning services were omitted last Sunday at the Congregational church, because of the illness of Rev. Frederick R. Dixon, who has been shut in several days with what was supposed to be an attack of measles.

The Growing Girl.

A girl when in her teens is passing through a critical period of her life. The transition from childhood to maturity is not always easy; consequently, in many cases health breaks down entirely and the girl goes into a decline and dies young. If she escapes this fate, she may fall into a state of permanent ill health. It is of the utmost importance, in order to insure normal and healthy development, that proper precautions be taken, and nothing has proved more helpful than the faithful use of Lydia E. Pinkham's Vegetable Compound, the great woman's medicine and tonic.—Adv.

THE VERMONT LAW prohibits glaring headlights on automobiles. Each automobile must be equipped with non-glare lenses. The "Safelite" lenses are the best on the market, increase your light, and no glare; \$1.50 per pair up to nine inches in diameter, \$1.75 over nine inches. Order them to-day of the Vermont distributors, Geo. D. Jarvis & Son, Burlington, Vt. Perfect satisfaction guaranteed or money refunded.—adv

CHILD'S TONGUE
BECOMES COATED
IF CONSTIPATED

When Cries, Feverish and Sick, Give "California Syrup of Figs"

Children love this "fruit laxative," and nothing else cleanses the tender stomach, liver and bowels so nicely.

A child simply will not stop playing to empty the bowels, and the result is, they become tightly clogged with waste, liver gets sluggish, stomach sour, then your little one becomes cross, half sick, feverish, doesn't eat, sleep or act naturally, breath is bad, system full of cold, has sore throat, stomach ache or diarrhoea. Listen, mother! See if tongue is coated, then give a teaspoonful of "California Syrup of Figs," and in a few hours all the constipated waste, sour bile and undigested food passes out of the system, and you have a well, playful child again.

Millions of mothers give "California Syrup of Figs," because it is perfectly harmless; children love it, and it never fails to act on the stomach, liver and bowels.

Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has full directions for babies, children of all ages and for grown-ups plainly printed on the bottle. Beware of counterfeits sold here. Get the genuine, made by "California Fig Syrup Company." Refuse any other kind with contempt.—Adv.

President Sees Bryan.

Washington, April 17.—The president received William J. Bryan at the White House yesterday. They conferred in the president's rooms before he went to his office.

Sick-Headache!

Dr. J. J. Caldwell says that this exceedingly distressing disease does not shorten life, but does not appear to be curable. Sufferers from this affliction are condemned to undergo the periodical attacks every few weeks until they are forty years of age, after which the attacks are less frequent, and finally disappear entirely. Palliative measures during the attack are all that it is possible to suggest, while care in the diet is the best preventive measure. An attack may often be prevented by taking two anti-kamnia tablets when the first symptoms appear, and one anti-kamnia tablet every two hours during the attack shortens it, eases the pain and brings rest and quiet. Anti-kamnia tablets may be obtained at all druggists. Ask for A-K Tablets. They quickly relieve all pain.

Studebaker
Established 1892

Why Your Next Car should be a Studebaker

IN THE FIRST PLACE, you will be SURE of its performance, for every Studebaker Car carries a 12-months' guarantee, a flat one-year insurance in addition to the convincing world-wide guarantee of quality that is given by the name STUDEBAKER itself.

In the second place, you will have a car of PROVED quality. For Studebaker quality—the result of Studebaker policy, Studebaker manufacturing resources and Studebaker engineering knowledge—is known all over the world.

The improvements, the many refinements of design, the practical perfection both of design and workmanship achieved by the continuous study of one basic Studebaker design in the hands of nearly 300,000 Studebaker owners in this country and abroad, have all combined to make the SERIES 18 Studebaker Car the one great VALUE car of the year.

The third reason why your next car should be a Studebaker is economy. From the standpoint of economy—what it costs to own and to run a car—Studebaker is, in the judgment of hundreds of thousands of people, the best buy on the market.

Its splendid quality insures lasting durability—and back of this lies the distinctive Studebaker ONE-YEAR guarantee. Its perfection of design insures GREAT power at the lowest possible consumption of gasoline—and back of this in the car itself there is built-in economy, the result of years of close study of a great army of Studebaker cars performing under every conceivable kind of service.

There is also to consider the actual saving of from \$300 to \$500 on the initial price, as compared with any other cars of equal quality—a saving made possible by the growing popularity of Studebaker cars and the resultant volume of manufacture.

Brief Details of Some of the Special Studebaker Features that Characterize Both the FOUR and the SIX

Power

40 horsepower in the FOUR, 50 horsepower in the SIX—and not merely "claimed horsepower"—but actual, developed, usable road horsepower—such masterful power makes Studebaker cars unique in their price range. In ratio of horsepower to gasoline consumed, Studebaker is the most powerful car on the 1917 market. And only years of practical experience, years spent in watching the performance of Studebaker cars on every kind of road, have made this giant, yet economical power possible.

Comfort

Both Studebaker Four and Six give far more room than the average touring car. Studebaker offers a scientific perfection of cushion work that, combined with remarkable chassis balance and

unusually resilient springs, make Studebaker cars unrivaled in riding comfort and ease on long continued tours as well as on short trips. The Studebaker cars, both the Four and the Six, are big, capacious 7-passenger cars, but do not weigh more than the average 5-passenger car, which means gasoline and TIRE economy as well. Studebaker front seats can be instantly adjusted to fit your particular needs. The right hand front seat of Studebaker cars is instantly and easily reversed—its occupant may face the tonneau at will.

Both Four and Six are fitted with auxiliary chairs that make them comfortable and capacious seven-passenger cars. When not in use they fold up and stow away under the rear seat—there are no unsightly gashes in the carpet or recesses in the front seats.

Roadability

In perfecting the chassis, Studebaker has secured that one essential feature which is so important to touring—ROADABILITY. Through balance, spring suspension, proper wheelbase, scientific distribution of weight, ease of control, Studebaker has developed the most roadable cars on the market.

Finish

The remarkable superiority of Studebaker coachwork is plainly evident in the beautiful, distinctive gun-metal finish with its ivory striping. Studebaker upholstery is of genuine highest grade, semi-glossed leather usually found only in the most expensive cars, and Studebaker uses in cushion work the best of real curled hair. The top is leather-bound. The carpet in the tonneau is leather-edged. Not a detail of finish is overlooked.

Other Specifications

Every Studebaker car is equipped with Blackmore patent door curtain openers. The side curtains open with the doors, making it as easy for you to get in and out of as a limousine.

Studebaker uses 13 Timken Bearings in its design.

Besides all the foregoing, a Studebaker equipment includes real one-man top, Stewart-Warner magnetic Speedometer, Yale Lock on the Ignition Switch, Motor-Driven Sparten Horn mounted under the hood, and a special adjustable rain-vision windshield that is built especially for Studebaker bodies.

Tires—on the Four, 34x4; on the Six, 35x4½.
